

## **Rain Gear**

**Category : Hiking Gear**

**Published by [Randy And Sheri](#) on 2005/12/6**

Rain Gear is an essential tool in the outdoors. Keeping yourself dry and protected from the wind can dramatically improve your level of comfort.

When selecting Rain Gear we took our entire layering system into consideration. We use a base layering system for warmth so we need rain gear to be a thin, lightweight top layer that will protect from water and wind. The [Men's GoLite Phantom Jacket](#) and the [Women's GoLite Phantom Jacket](#) will keep the wet outside while maintaining a breathability that allows us to control body temperature on the inside.
